The login process for attorneys and experts changes with the v6.4 release. The first time you access eVoucher, you will be prompted to set up a new single login profile.

- Provide the email address you want to use to log in. You must have access to this email to verify it.
- Type the Username and Password for your eVoucher account. This only needs to be done once.

The system will guide you through...
- completing your new login profile,
- selecting and answering three security questions,
- verifying your email address, and
- setting your password.

Upon completion of this process, you will use your email address and password for all future logins to eVoucher.
